organized and incorporated in 1973

Membership Application

Why Join?

To be part of a long-established community group working to improve Saugus. **“Think globally, act locally”** the current mantra for global warming solutions, describes well our past and continuing actions.

SAVE members have, among other projects, helped establish curbside recycling in Saugus, conserved historic and environmentally sensitive land on Vinegar Hill, and established a scholarship for local students entering a field of study that benefits the environment and preserves the philosophy of SAVE.

As a member you will meet others with similar goals. Do as much as you like, or just support our activities with your name and dues.

SAVE is committed to encouraging and supporting local, state and national legislation that promotes, establishes, and expands programs for solid waste management based on "reduce, reuse, and recycle", so that each day we get closer to the goal of **'zero waste'**.

SAVE supports:

- the preservation and protection of all natural resources, particularly our wetlands.
- national/state/local legislation to reduce or eliminate pollution
- the careful, long-range planning of remaining open space in town.
- laws to protect and preserve all sites of historic interest to Saugus.

Join SAVE and help shape Saugus's future.

2015 SAVE Board
